Projects
(More on GitHub)

Apex Legends Info/Stat Lookup
Github here   Live site here

Typescript, Next.JS site built out of my love for Apex!

- In Short: Site to look up stats on anyone. And also check the map rotation for both BR & arenas as well as the Crafter rotation.
- Used "Apex Legends Status" Api – JSON object 1600+ lines
- Tailwind CSS

Miles-till-Empty Accuracy Tracker
Details & Demo on Github here

React-Native App to see how accurate your car's Miles-till-Empty reading is!

- In Short: This app will take info you give it and compare the reading to how many miles your odometer read (More info on Github).
- Managed State using Redux Toolkit & React Hooks.
- Used Firebase Auth for login/registration, Firebase Firestore for backend storage.
- Used React Native Elements as well as twrnc (Tailwind React Native Classnames) for styling.

E-Commerce Website
Github here   Live site here

E-commerce website built in Typescript & Next.JS.

- In Short: Users can add products to their carts (add or decrease quantity) and ultimately check out.
- Managed state using Redux Toolkit & React Hooks.
- Sanity backend
- Uses SSR & SSG.
- Tailwind CSS

About
Quick learning I.T. Manager with a self-taught passion for developing. Looking to develop applications that will make a meaningful change in people's lives.
